# THE PACIFIC IRON WORKS.

ESTABLISHED IN 1850.

EMBRACING

## FOUNDRY, MACHINE, BOILER, FORGING and SMITHING,

Pattern and Wood Work Departments, Drawing and Library Rooms, Etc.

*GEORGE W. FOGG, Superintendent.*

IRA P. RANKIN.

ALBERT P. BRAYTON.

These works have now been in successful operation for the past twenty years. From a comparatively small beginning in the year 1850, its increasing patronage has each year demanded enlarged facilities, until our establishment, in all its appointments, will compare favorably with that of any similar one in the country.

Our patterns, in variety and extent, are unsurpassed; embracing the latest improvements in all classes of machinery, adapted to its use on this coast. Our several departments are well equipped with skillful workmen, and efficient tools; enabling us to execute all orders entrusted to us promptly, and in the most workmanlike manner. With ample facilities for doing work, as also for procuring our supplies from first hands, we are enabled to give our customers first class machinery at prices frequently paid for inferior work. The most skillful designing and engineering talent, applying to the various branches of mechanical work, constantly at the service of our customers.

Orders for all classes of Machinery, Castings or Boiler Work, promptly executed at the most reasonable rates. Particular attention given to Steamboat and Steamship Work. Mining and Hoisting Machinery of the most approved construction. Depot for the HANSBROW PUMPS.

Richard Johnson & Nephew, Wire Manufacturers, Manchester, England

### 'MINING COMPANIES, FERRYMEN, AND SHIPMASTERS

Are informed that Wire Rope can be furnished them considerably under the cost of Hemp or Manila, of equal strength. Wire Rope does not stretch or shrink by change of weather. It weighs 40 per cent. less than Hemp; is less than one-half the diameter; is easily spliced under all circumstances; is as pliable for equal strength; and is from four to five times as durable as the best Hemp or Manila Rope.

*For Hoisting from Deep Mines, the economy of its application is immense.*

The Wire from which my Ropes are made is manufactured in San Francisco by the Pacific Wire Manufacturing Company, from the very best of Stock.

NOTE.—STEEL WIRE ROPE weighs about six-tenths of Iron Rope, or one-third of Hemp of equal strength. Its extreme lightness saves largely in freight to remote places, and its great durability recommends it for hoisting purposes, etc. See table of comparative weights, strengths, and sizes of

| Steel Wire Rope. |                 | Iron Wire Rope. |                 | Hemp Rope.    |                 | Working load of each. |

### · ENDLESS WIRE ROPEWAY,

(Wire Tramway) secured by numerous patents.

By means of the Ropeway, ores, rock and other material can be transported over mountainous and difficult places, where it would be impossible or exceedingly expensive to build a road. It can deliver from five to fifty tons per hour, according to capacity; and being carried upon posts above snow and other obstructions, can be used when other modes of transportation would be impossible.

**T**HIS INSTITUTION HAS BEEN ESTABLISHED SIXTEEN YEARS, AND FOR the past three years its interests have been committed to Universal Medication as embraced in Hygiene and Allopathy. This is but the reformatory demand of the California people, and now embraces in its materia medica Surgery, Medicines, Hygiene, Hydropathy, Electro and Magnetic Motorpathy, the Inhalation of Medicinal Oxygen, Aqua Vitæ and other mineral spring waters, besides the advantages of a domestic home and a healthful dietary. These various means systematically and scientifically combined, together with the supreme advantages of climate, afford us the rational means for the more speedy, certain and permanent cure of the following medical and surgical diseases than can be performed in any other part of the world:

Paralysis in its various forms, as Hæmaphlegia, Paraphlegia, Paralysis Agitans or St. Vitus' Dance; Rheumatism, Gout, Neuralgia, Dyspepsia, Costipation, Liver and Kidney diseases, as well as Consumption, Bronchitis, Catarrh, Asthma, Anæmia, Chlorosis and all Female Diseases, as Prolapsus, Ulceration, Retro and Ante Version and Flexions, Hypertrophy, Chronic Inflammations and Ovarian Tumors.

Cutaneous Diseases, simple and specific (after the mode of Prof. Von Hebra, of Vienna)—Scrofula, Glandular Enlargements, Cancers, Varicose Veins, etc., as well as the various surgical operations for Hæmorrhoids, Varicocele, Saracoele, Fistula, Prolapsus Ani, Urethral Strictures and all sexual weaknesses and diseases.

Consultations and Phreno-Physiological examinations in regard to health, FREE. Office hours from 8 A.M. to 8 P.M.; Sundays, 8 A.M. to 12 M.

**T**HE publication of a Directory involves so many delicate considerations that are not absolutely requisite in works of ordinary character, that it was only after much hesitation we applied ourselves to the task. The expense attending the compilation of such a book is far greater than usual, as a large corps of assistants must be employed to collect facts, and they must be men of the ability and intelligence which will command a fair remuneration for services rendered. The first quality in point of importance is ACCURACY, without which a Directory would be valueless. Next to this is FRESHNESS, especially in a new and rapidly growing city like San Francisco, where changes in business firms, in private residences, and in the marts of trade, are frequent, and where a large number of new buildings are being constantly erected.

The method of arranging and classifying the contents of a Directory is a prominent feature, saving much time to the inquirer, and simplifying his search for information. Another valuable consideration is clearness of TYPOGRAPHY, a point that has been too frequently disregarded in works of this character, and one we have striven to accomplish with credit to ourselves, and benefit to the public. Without COMPLETENESS of details a Directory loses much of its value, and we have, therefore, endeavored to fill that want with as much care as it was possible to bestow.

There is nothing perfect under the sun, but by the proper and considerate use of care, diligence and fidelity to details in its various departments we have endeavored to make this work as nearly perfect as circumstances would permit. It was undertaken not as a mere venture of temporary character, but with the determination to continue it throughout the coming years, and, if possible, render it a permanent and valuable reference on all subjects coming within the scope of its legitimate sphere. To effect the full and satisfactory accomplishment of this purpose we have made arrangements for producing a much better and more complete Directory than any other city of the Union can present. Our

expenses will necessarily be largely increased, but having put our hands to the plow we will not relax our grasp until the field has been thoroughly turned over. There are probably no better or more reliable evidences of the growth and progress of cities than are furnished by their respective Directories. The increase or decrease in population, commerce, manufactures, financial strength, and the numberless fluctuations in all branches of industrial pursuits, together with many other matters of interest, are revealed by comparing the Directories of one year with another, from the present with the far past. Such works have, therefore, a peculiarity of their own, which renders them valuable long after the date of their publication.

The wonderful development of San Francisco as a great commercial metropolis, and the rank it has acquired as the third maritime port of the United States, together with its constantly increasing trade—foreign and with domestic ports—and its rapid expansion in point of importance, wealth, population, and industrial production, are attracting the attention of the whole world. To keep pace with such progress, by elaborating the various features of its accomplishment and onward march, requires the collection of a vast mass of information gleaned only from sources entirely reliable, and in this respect we flatter ourselves that we have been successful.

#### FINANCIAL.

The first thing to be considered, in this connection, is the financial status of this city; what are its banking capital and facilities; how much money is there in the community; how distributed, and what is the manner of its management? There are now eleven Savings Banks in San Francisco, containing the very large amount of \$55,000,000, gold coin, in round numbers, which stands to the credit of 60,660 depositors, and is equal to \$907, gold, to each depositor. This is far in advance of any other place on the globe, being equal to \$970 when reduced to currency at present values, and is, therefore, \$627 more than is owned by the individual depositors in the Savings Banks of New York and New England, where the highest average to each depositor is \$343, currency. In all European countries where such institutions exist the average is much smaller. The benefits conferred upon a community by the establishment of Savings Banks are so many and so valuable that it may not be out of place to make some allusion to them. They serve as a business link between the richer and poorer classes, and imbue the latter with a sense of independence they would not otherwise possess. They also serve to convince the richer classes that they are, to a large extent, under obligations to the poorer for combining their numberless financial rills into one lake of affluence, from which can be drawn the vitalizing streams to expand commerce, manufactures, agriculture, and all sorts of enterprises. The money so used furnishes additional employment for labor and productive industry, besides being returned to its owners with remunerative accretions. It is axiomatic, that the possession of large means by the masses insures confidence in the public mind, and promotes a love for the permanence of peace, law and order throughout the community, and it is a most noteworthy fact, that wherever Savings Banks do most abound the people are better educated, more independent, and intelligent, and more steadfast in their devotion to principle and justice. We herewith append the semi-annual returns of the San Francisco Savings Banks, as officially reported by the "Commercial Herald" for the six months ended December, 1874:

**COMMERCIAL BANKS.**

Of these institutions there are twenty-two now existing in this city. We have been at no little pains to obtain a correct statement of their financial strength. Occupying the foremost rank is the Bank of California, the capital and deposits of which amounts to nearly \$15,000,000, and its operations are on a vast scale, extending to every portion of the commercial world. Next in order is the London and San Francisco Bank, limited; Anglo-Californian Bank; Merchants' Exchange Bank, and a large number of others transacting a lucrative business.

At the commencement of last year the banking capital of the State was estimated to be \$100,000,000, but since then there have been very material additions to that amount. Several new banks have been established, and much money that had been lying comparatively idle has come into active circulation. The yield from our various deposits of precious metals has also been larger, and considerable outside money has sought employment in this State. The incorporated and private banks of San Francisco, exclusive of the savings and loan societies, now hold an aggregate deposit of \$25,000,000, and similar institutions in the interior have about \$5,000,000 more; add to these the \$55,000,000 of deposits in the city savings banks, and \$15,000,000 in those of the interior, gives a total deposit account of \$100,000,000. The capital stocks of these institutions do not vary much from \$35,000,000, while their surplus asset accounts may reasonably be set down at \$5,000,000, showing a grand total banking capital of \$140,000,000, gold. The most prominent of our city banks of discount hold deposits after the following order: Bank of California, \$11,500,000; London and San Francisco Bank, limited, \$2,500,000; Merchants' Exchange Bank, \$2,000,000; Anglo-Californian Bank, \$1,000,000.

**NATIONAL GOLD NOTE BANKS.**

These institutions are peculiar to California, as their existence in the East conflicts with the operations of the National Banks of that section which do business in greenbacks and National Bank Notes of changeable values. Our Gold Note Banks operate in accordance with an act of Congress, passed in July, 1870, and another passed at the last session of that body. By the provisions of the former law their capital was restricted to \$1,000,000 each, and they were compelled to deposit with the United States Assistant Treasurer, government six per cent. bonds to the extent of \$1,250,000 each, and keep on hand gold enough to redeem their notes on presentation before they could issue a single dollar. The restriction limiting their capital to \$1,000,000 was repealed at the last session of Congress, and they can now circulate notes to an unlimited amount, provided they deposit government six per cent. bonds with the Assistant Treasurer, in sums sufficient to insure security in accordance with law. There are two such Banks in this city, viz: the First National Gold Note Bank of San Francisco, and the National Gold Bank and Trust Company of San Francisco. Following is a statement of their respective conditions at the close of 1874:

**COMMERCE AND NAVIGATION.**

The transition which San Francisco has undergone within the short period of twenty-seven years has been so wonderful, so utterly beyond all precedent, that it seems to be more like a tale in the "Arabian Night's Entertainments" than a record of actual history. In 1847 it was but a scanty collection of adobe huts, scattered about in apparent confusion, and nestling amidst a mass of scrub oaks and desolate sand hills. To-day it occupies the proud position of being the third most important maritime port of the United States, bustling with life, energy and commercial greatness; its miles upon miles of streets adorned with elegant and substantial buildings; its noble harbor crowded with the shipping of all nations; its wealth and importance recognized the world over, and its future promising even more startling results than its past in the same space of time. Institutions of learning and scientific research, in all departments, abound, and are multiplying rapidly. Rich endowments have been bestowed upon them, and on the broad face of the earth there is not a city more prosperous and progressive. In 1874 she paid to the Federal Government for Customs on imports the large sum of nearly eight millions of dollars, and for freight charges on imports and exports over twelve millions. During the same year this port was visited by 4,204 vessels, representing 1,553,500 tons, as indicating the maritime commerce it already enjoys. The gain in this respect over 1873 was 557 more vessels, and 260,116 increased number of tons. Her steam fleet arrivals registered 275,268 tons, being a gain for the year of 59,429 tons, and 91,818 tons in three years. We exported in 1874 eleven million centals of wheat, valued at nearly \$15,000,000 gold coin, and imported merchandise to the value of \$31,500,000. Of treasure San Francisco exported over \$30,000,000, and in merchandise \$28,000,000. Her receipts from domestic resources comprise 40,000,000 pounds of wool, 5,000,000 gallons of good wine, \$36,000,000 in treasure, and immense quantities of other articles. Her lumber trade required the importation of 253,500,000 feet, exclusive of ships' knees, railroad ties, spars, laths, shingles, etc. Her trade with domestic Pacific ports has kept pace with the expansion of commerce in other directions, the increase in the tonnage so engaged being 124,336 tons over 1873. During the past year our population has been augmented from outside sources 62,000 souls, and the tide of immigration is pouring in with additional velocity. As an evidence of the heavy financial transactions that occurred in San Francisco during the past year it is only necessary to state that mining share stocks were dealt in to the extent of \$260,000,000; that in conjunction dividends were disbursed to the amount of \$25,000,000; that real estate transactions reached \$24,000,000, and that the Mint coined over \$27,000,000. These are only some of the results obtained in the very short space of twenty-seven years, there being many others of importance which we have no space to mention in detail; but they are enough to convince the intelligent that a most brilliant future awaits this city and State.

**OVERLAND TRAFFIC.**

The growing immensity of the Overland carrying trade, as evinced by returns compiled by the Central Pacific Railroad Company, may be gathered from the rapidity of its progress. The railroads have been less than five years in operation, and the commencement of the traffic was necessarily slow. Many distant interior points with which we had very limited business connection, and many more that were entirely in the hands of Eastern merchants, had to be reached and controlled by our own people through the agency of the Trans-Continental Railroad. The little ball then set in motion has assumed such gigantic proportions that its future will be, undoubtedly, of the most vital importance to every interest in this State. Shipments eastward in 1872 were 65,284,000 pounds; in 1873 they were increased by only 9,000,000 pounds, their aggregate being 72,451,000 pounds; but in 1874 they went up to 149,000,000 pounds, or 5,000,000 pounds more than a gain of 100 per cent. Of this increase San Francisco had 58,000,000 pounds more than the year preceding. We have no means of ascertaining the amounts of merchandise received overland from the East, but it is reasonable to presume that they were correspondingly large. The returns furnished by the railroad company are very suggestive, as they show what particular classes of our products are required by Eastern consumers. A few of the leading items of freight, chiefly of California production, will prove of interest to the inquirer. Barley shipments have been enormously increased. In 1873 the trade sent forward 1,217,000 pounds, while only for the last quarter of 1874 not less than 37,896,423 pounds of this cereal were shipped. Of borax, shipments in 1873, 619,449 pounds; do. in 1874, 1,497,860 pounds. Of canned goods, chiefly fruits, in 1873, 658,185 pounds; in 1874, 1,132,291 pounds. Of dried fruits, in 1873, we sent East less than 100,000 pounds, yet in 1874 the amount was swelled up to 1,354,385 pounds. The hop shipments for 1873, by rail, 320,000 pounds; in 1874, 794,186 pounds. Of leather, in 1873, 159,169 pounds, and in 1874, 753,739 pounds. An increase of lumber of about 1,500,000 feet; of malt, an increase over the year previous, 1,811,567 pounds; of unspecified merchandise, an increase of 6,000,000 pounds, as compared with 1873. Of salmon, 6,432,021 pounds, showing an increase of 3,000,000 pounds, as compared with 1873. Syrup shipments in 1874, 4,000,000 pounds more than in 1873. Of sealskins, 1,473,860 pounds in 1874. Of tea we have sent East overland, in three years past, about 36,000,000 pounds, and equally divided, notwithstanding the very large amount turned off via Panama by the Pacific Mail Steamship Company. This one fact alone speaks volumes in favor of the Overland route for the carrying of teas—a saving in time of fully twenty if not thirty days; besides the teas are fresher and better every way for not being exposed twice to the tropics. The increased carrying trade in California wines is noticeable, being nearly 5,000,000 pounds against 7,000,000 pounds for the two years preceding. As for wool, shipments by rail for 1874, 30,000,000 pounds; 1873, 26,000,000 pounds; 1872, 17,675,000 pounds. On the other side, we mark a great falling off in coffee. Shipments to the East in 1872, 1,559,558 pounds; 1873, 4,101,836 pounds; in 1874, 923,353 pounds. The reason for this falling off of 3,000,000 pounds last year was owing to the heavy imports and Eastern panic, causing prices on the Atlantic to drop much lower than on the Pacific slope; consequently buyers in Chicago and St. Louis could purchase their coffee cheaper in Baltimore or New York than in San Francisco.

If these gathered evidences of surprising progress do not demonstrate the immense benefits conferred by the Overland Railroad we know of nothing that can.

**SHIP BUILDING.**

One of the most important elements in the progress of a great maritime port is the ship building industry, and it is gratifying to know that in this particular San Francisco is beginning to develop a deep interest. During 1874 thirty-two vessels, aggregating 2,392

registered tons, were built in this Customs District, and many more of large tonnage were launched from the shipyards of Puget Sound and other northern places, for San Francisco owners. Accurate calculations, based upon the sums actually paid on inward and outward freights for 1874, prove that the amount paid for that service alone was in the neighborhood of \$12,000,000. Taking the increased disbursements for freight charges that have occurred year by year, and adopting that as a criterion, we shall, at the same rate, be compelled to pay over \$100,000,000 gold coin, by the close of 1879, and as nearly the whole of this service is performed by ships owned at the East and in foreign countries, it is obvious that this enormous amount will find its way into the pockets of such owners instead of those of our own people. It is, therefore, a signal service that is being rendered to the community by our ship builders. The question of superiority of timber for that purpose has been elaborately discussed, experimented upon, and decided in our favor. The facilities of this coast are unsurpassed for the prosecution of this business, and the climate is all that could be desired.

### MANUFACTURES.

Probably no country on the globe possesses more natural facilities and better opportunities for manufacturing purposes than California. As it is not subject to the sudden and excessive changes of heat and cold, and has nearly an equal temperature throughout the year, all sorts of manufacturing industries can be carried on with great advantage. So thoroughly has this fact impressed itself upon observant minds that during the past year several large interests of this kind were removed from the East, where they had been long established, and transferred to this city. Few people not personally concerned are aware to what extent manufactures are now carried on in San Francisco, and it is worthy of note that wherever our products have come into competition with those of other places we have borne off the palm of victory. The incessant demands of our miners and farmers have called into existence a system of large foundries, the principal of which are the Union, Miners', Fulton, Ætna, Golden State, Vulcan, Pacific, Pioneer, Phoenix, Portland, California, Eureka, Columbia, Occidental, Risdon Boiler Works and Pacific Rolling Mills. The articles turned out of these hives of industry are superior to any others known. We have also the largest smelting and reduction works in the country, wire and wire rope works, a number of first-class woolen mills, cordage factories, thirty-five to forty tanneries, silk factories, cigar factories by the hundred, match makers, box, sash and door factories, glass factories, saw and planing mills, basket and broom makers by the score, shot towers, cooperages, furniture and cabinetmakers, boat and ship builders, musical instrument makers, carriage makers, clock and watchmakers, and so on, to the number of nearly two hundred establishments, representing many millions of money. We are fast becoming independent of outside supplies for many articles of consumption, and are beginning to occupy the field as factors for other markets.

### REAL ESTATE—NEW BUILDINGS.

The progressive tendencies of our people are admirably depicted in the style, size and general appearance of the edifices now built as compared with those constructed prior to 1860. The era for paper and pasteboard houses has passed away forever, and San Francisco now boasts a very large number of buildings which will compare favorably with those of any city in the Union. During 1873 there were six hundred and seventy-one new

brick and frame buildings put up in this city, and in 1874 the number was increased to two thousand one hundred and fifty-nine, many of them elegant, costly and stylish. It will reasonably be inferred that real estate transactions kept pace with this development in building. In 1873 there were three thousand one hundred and thirty-four sales of real estate, valued at \$12,383,752, with the buildings and improvements thereon. In 1874 there were three thousand eight hundred and fifty-four sales made, aggregating \$23,823,903, being a gain of 720 in number of sales, and \$11,510,151, or nearly double in value of property sold. It is not necessary to comment upon these figures to show with what rapid strides San Francisco is progressing on the road to population, wealth and power.

#### POPULATION.

As a snow-ball of moderate size increases in volume by being rolled over the surface of the snow, and takes up a much larger quantity in proportion to its bulk or surface, so does the population of a thriving commercial mart augment as the years roll by, and is enlarged not only from outside accretions, but also from its own productive resources. It is an axiom in finances that "money makes money," and it is no less true that people make people. According to the Federal census, taken in 1870, the population of San Francisco at that time was 149,500, in round numbers; but there is abundant reason to believe that the census was much below the mark. The aggregate population in June, 1873, was rising 188,000, and in the same month of 1874 not less than 200,000, being a gain of 50,500 in three years, or more than 50 per cent. The most accurate estimates made at the commencement of 1875 are that the city then contained at least 235,000 souls, being an increase of  $17\frac{1}{2}$  per cent for six months, or 35 per cent for the year. This rate of increase is equal to a gain of 86,000 in four years, or nearly 58 per cent. upon the numbers of the census year. Taking this ratio as a guide for the ensuing four years, we shall have at the close of 1878 not fewer than 400,000 people in the city. We are dealing in round numbers, and speaking of the aggregate population, including visitors and temporary sojourners, as well as resident inhabitants. It must, however, be remembered that the more numerous our population becomes from year to year, the more rapid will be its increase from home production; and as the city grows in size and importance, it will attract a greater amount of immigration by sea and land.

### THE NEW POSTAGE LAW.

By an Act of Congress approved July 23d, 1874, it is required that on and after January 1st, 1875, postage on newspapers and periodical publications mailed from a known office of publication or news agency, addressed to regular subscribers or news agents, shall be charged at the rate of two cents per pound if issued weekly or oftener, and three cents per pound if issued less frequently than once a week. The Act provides that matter shall be weighed in bulk and prepaid with adhesive stamps to be specially devised for the purpose. The manner of applying the stamps is left discretionary with the Department, and a system which, it is to be hoped, will work satisfactorily, has been devised for carrying the law into effect. The stamps are now in course of preparation, and will be ready at the time appointed for their use. It is expected that the revenues of the department from postage on printed material will be increased by the enforcement of this Act, notwithstanding that the rates are cheaper than before, as now postage will be prepaid, while heretofore much loss has been occasioned to the department on account of the non-collection of postage at the point of delivery.

# STREET AND AVENUE GUIDE.

## EXPLANATORY.

"Market street shall be the starting point for the numbers on all buildings fronting on the streets running therefrom in a northerly direction, and also for those running therefrom in a southwesterly direction. The streets laid down in the official map of the city as forming the water front thereof, shall be the starting point for numbers on all streets running westerly and southwesterly therefrom, except upon such streets running westerly commencing from Market street, and upon all such streets Market street shall be the starting point for numbers. On all streets the numbers on the northerly or northeasterly sides thereof shall be even numbers, and on the southerly or southwesterly sides thereof shall be odd numbers. One hundred numbers, or as many thereof as may be necessary, shall be allotted to each block bounded by principal streets, numbers 100, 200 and 300 being respectively the numbers for commencing the blocks distant one, two and three streets from the starting point on the side designated for even numbers, and numbers 101, 201 and 301 in similar manner for the opposite side of the street throughout its extent; so that the initial figure of the number placed on a building at any street crossing shall indicate the number of main streets such street crossing is from the starting point. Not less than twenty feet in frontage of all vacant lots of ground shall be allowed for each number. On all cross or intermediate streets the numbering shall commence where said streets begin, and shall conform to the plan specified in this Order."—City Ordinance.

COLORED PRINTING A SPECIALTY.

# A. L. BANCROFT & COMPANY,

Publishers, Manufacturers, Importers and Wholesale and Retail Dealers in

## BOOKS, STATIONERY, PIANOS, MUSIC, ETC.

ALSO,

*Printers, Lithographers, Engravers and Bookbinders.*

The most complete business of its kind in the country. It is thoroughly systematized and divided into departments—each being in charge of a competent Manager—as mentioned below.

**Wholesale Department.** Headquarters located on the first floor. All business connected with the wholesale and jobbing trade is referred to it. The immense stock of Stationery in all its branches, occupying portions of three floors, is under its management.

**Retail and Library Department.** On the first floor. Whatever is for sale in this entire establishment can be purchased at retail in this department. The miscellaneous, scientific, medical and theological books are specially under its supervision. All are thoroughly classified, there being nearly two hundred divisions and subdivisions, embracing every prominent subject of reference.

**Law Department.** On the first floor. It embraces the law books—about thirty volumes; and the legal blanks—over 1500—published by the firm; and a very large and complete stock of text-books and reports imported from the East and Great Britain.

**Educational Department.** On the first floor. It includes such school books and school stationery as are published and manufactured by the firm, and an immense stock of school books and school apparatus imported from the East. The main stock is stored in deep alcoves extending along nearly one entire side of the basement.

**Music Department.** On the second floor. Embraces several lines of pianos, square and upright, and a large variety of cabinet organs and melodeons. Also, a fine stock of sheet music and music books. Latest music periodicals kept on file for free reference.

**Subscription Department.** On the second floor. The firm has the agency for the best and most popular subscription books, maps and pictures published in the East, and has a large corps of text-agents constantly in the field in every part of the Coast. Agents wanted.

**Printing and Lithographing Department.** This department occupies the entire third floor, and has the necessary steam presses and machinery for executing all kinds of printing, lithographing, engraving, initial stamping, etc.

**Blank Book Manufacturing Department.** Occupies the entire fourth floor, 75 by 170; contains the most complete set of machinery for ruling, folding, binding and manufacturing blank books, to found on the Pacific Coast. The machinery of the printing and binding departments is propelled by an engine and boiler located under the Stevenson Street sidewalk.

**Publishing Department.** Bancroft's Historical Library on the fifth floor, is the basis of important scientific and descriptive works of a local nature, and maps and books of reference relating to the Pacific Coast, to be issued by the firm, from time to time.

The stock of merchandise and manufactures comprised in the above Departments is the most complete and varied of any single establishment in this line of business to be found in any country in the world. *Special lines of goods and special features of the business are mentioned below.*
